WORK EXPERIENCE

Liferay **Madrid, Spain**

Software Engineer — Headless team *October 2023 – Present*

Team owns the platform's API infrastructure — Export/Import, Staging, Batch Engine, Data Migration Center, API Builder, and MCP Server.

- Architected the Export-Import headless API revamp — new REST layer and from-scratch UI library (37 tickets, one quarter).
- Rolled out Playwright test infrastructure across 6+ modules, moving a 15-engineer team off legacy Poshi (100+ tickets owned).
- Drove team-wide adoption of AI dev tools (Claude Code, Gemini CLI); output grew 2.4× YoY (395 → 936 commits, 2025).
- Onboarded 3 engineers to the headless team's codebase, with new hires resolving tickets independently within 10 days.
- Review teammates' pull requests across the team's modules, gating changes before they reach the product.
- Handle customer tickets escalated by Support (since 2024): investigate root cause and decide the fix strategy.
- Deliver hotfixes and backport them across supported product versions.

Software Engineer, Graduate Program — Content Management team *October 2022 – October 2023*

- Developed and maintained features across core content modules: Wiki, Knowledge Base, Web Content, and Documents & Media.
- Delivered full-stack bug fixes and enhancements (Java, JSP, React) across the content-management platform.

GlobalSuite Solutions **Remote**

Junior Data Engineer *February 2022 – September 2022*

- Built an AWS data lake (S3, Glue, Athena) and ETL workflows over previously siloed data sources.
- Developed the backend RESTful API (PHP) exposing the aggregated data to consumers.
- Built React dashboards for reporting and data visualization.
- Designed and populated the MongoDB collections backing the platform.

University of Castilla-La Mancha (UCLM) **Ciudad Real, Spain**

Research Assistant *February 2021 – March 2021*

- Researched decentralized security and how to implement RBAC (Role-Based Access Control) with Ethereum smart contracts.
- Set up the team's DApps framework, supporting its research infrastructure.

EDUCATION

Universidad Carlos III de Madrid **Madrid, Spain**

MSc in Financial Sector Technologies (Fintech) *September 2025 – July 2026*

- Quant Finance: derivatives pricing (Monte Carlo, Black-Scholes), fixed income and yield curves, in *Modern C++* and *Java*.
- Risk management: sensitivity analysis (Greeks), Value-at-Risk and Expected Shortfall, and model backtesting.
- Market infrastructure: electronic trading, Clearing & Settlement, payment systems, and digital assets.
- Data, ML & Blockchain: Big Data (Hadoop, MapReduce), ML in finance, market protocols, and smart contracts (eIDAS).
- Thesis (DLT): an interoperability model for wCBDCs across heterogeneous Central Bank DLT networks (cross-border payment rails).

University of Castilla-La Mancha (UCLM) **Ciudad Real, Spain**

BSc in Computer Science (Software Engineering) — Graduated with Distinction *September 2017 – July 2022*

- Bilingual (English) degree focused on software quality and engineering; 9.0/10 on Final Thesis.

ACTIVITIES & INTERESTS

Languages	Spanish (native), English (full professional proficiency), French (basic).
Skills	Proficient in Java, Spring Boot, React, TypeScript, JSP, Playwright, OpenAPI, SQL, Git, AWS (S3, Glue, Athena), PostgreSQL, MongoDB, MariaDB, Linux, and DLT / smart contracts.
	Basic proficiency in C++.
Interests	Gym, team sports (football, handball), golf, cooking, and music.
